

1	The application must provide an intuitive and easy-to-use interface for both calendar and to-do list functionalities, allowing for effortless navigation and management.			
2	The application must allow users to view and manage calendar events and to-do lists in a single platform, integrating both scheduling and task management.			
3	The application must support adding calendar events with details (time, location, notes) and allow the creation of prioritized to-do tasks with deadlines.			
4	The application must deliver notifications and reminders for both upcoming events and tasks to ensure users remain informed about their schedule and deadlines.			
5	The application must allow categorization of to-do list tasks (e.g., by Work, Personal, etc.) to facilitate easier filtering and focus on specific areas of responsibility.			
6	The application must provide functionality for creating recurring events and tasks, reducing the need for repetitive manual input.			
7	The application must store calendar and to-do list data locally to ensure data persistence and access after closing the app.
